

NEW NATIONAL ADVERTISING

Ultra-Premium Replit Website Build Prompt

Copy the complete prompt below into Replit AI. It contains the brand information, verified service structure from the supplied photographs, UI/UX direction, animations, integrations, SEO, responsiveness and final quality requirements.

Build a PREMIUM, ULTRA-MODERN, HIGH-END WEBSITE for a Mumbai-based printing and advertising company called:

NEW NATIONAL ADVERTISING

This website must NOT look like a generic local printing-shop website.

The goal is to make it feel like a professional creative production studio / advertising company with a strong visual identity.

The MOST IMPORTANT PRIORITY is:

1. DESIGN
2. UI/UX
3. VISUAL STORYTELLING
4. PREMIUM ANIMATIONS
5. MICRO-INTERACTIONS
6. RESPONSIVENESS
7. PERFORMANCE
8. SEO

Do not sacrifice the visual quality.

=====
BRAND INFORMATION
=====

Business Name:
New National Advertising

Business Type:
Printing Services / Advertising / Signage / Graphic Design

Location:
Mumbai, Maharashtra, India

Primary Contact:
9555759677

6. GRAPHICS DESIGN

Include:

- Logo Design
- Social Media Posts
- Hoarding Banner
- Menu Card

- Flyer
- Product Packaging
- Magazine Ads
- Visiting Card
- Invitation
- Brochure
- Calendar

7. OTHER PRINTING / ADVERTISING PRODUCTS

Include:

- Banner Print
- Sunboard / Sunpack
- Acrylic / Signage-related printing
- PVC Card
- Resume / Bio-Data
- Wooden / MS Frame
- Large Format Printing
- Advertising Materials

Do NOT invent services that the company has not provided.

WEBSITE CONCEPT

Create a visual identity around:

PRINT.
DESIGN.
ADVERTISE.
CREATE.

The website should communicate:

"From an idea on a screen to something people can physically see."

Use a sophisticated creative-agency aesthetic.

Think:

- premium print studio
- modern advertising agency
- design laboratory
- physical + digital creativity
- bold typography
- editorial layouts
- cinematic transitions
- tactile printing-inspired details

Do NOT make it look like an e-commerce store.

Do NOT fill the page with boring rectangular cards.

Do NOT use excessive gradients.

Do NOT use generic stock-photo corporate imagery.

Do NOT use a template-looking design.

VISUAL STYLE

Use a premium monochrome foundation:

- Off-white / warm white
- Deep black
- Charcoal
- Soft grey

Then introduce a strong accent color inspired by printing/advertising.

Possible accent:

- vivid red

OR
- electric blue

Use the accent carefully.

The website should feel:

- sophisticated
- bold
- artistic
- professional
- premium
- trustworthy
- energetic

Typography should be extremely important.

Use a modern display font for large headings and a clean sans-serif for body text.

Create strong typographic compositions.

Example visual language:

"WE PRINT
IDEAS."

"YOUR BRAND,
IN THE REAL WORLD."

"DESIGN.
PRINT.
MAKE AN IMPACT."

=====

HEADER

=====

Create a premium sticky navigation.

Desktop:

NEW NATIONAL
ADVERTISING

Navigation:

Home
Services
Our Work
About
Contact

CTA:
GET A QUOTE

The navbar should become slightly smaller / more compact when scrolling.

Use smooth transitions.

Mobile:

- logo/brand
- hamburger menu
- full-screen animated navigation overlay

=====

HERO SECTION

=====

The hero must be spectacular.

Do NOT create a normal:
"Welcome to New National Advertising"

Instead use large editorial typography.

Possible composition:

NEW
NATIONAL
ADVERTISING

with a small supporting line:

PRINTING • SIGNAGE • DESIGN • ADVERTISING

Headline concept:

"WE TURN
IDEAS INTO
SOMETHING
YOU CAN SEE."

Include CTA buttons:

EXPLORE SERVICES
GET A QUOTE

Add a visual element representing print production.

For example:

- oversized paper sheets
- layered print samples
- animated poster compositions
- CMYK-inspired details
- moving crop marks
- registration marks
- print textures
- subtle grain

Animations should feel physical rather than gimmicky.

Hero elements should reveal themselves as the user enters the page.

=====

INTERACTIVE PRINT EFFECT

=====

Create an impressive interactive visual effect.

As the user moves the cursor:

- paper/card layers subtly move
- shadows shift
- text has slight parallax
- small print-registration marks move
- image/poster layers respond to pointer movement

Keep it elegant.

Do not overdo it.

On mobile, replace pointer interactions with subtle scroll-based motion.

=====

SERVICES SECTION

=====

Create a visually rich services section.

Title:

WHAT WE CREATE

Do NOT simply create 7 normal cards.

Instead create an interactive service explorer.

Each service should occupy a large horizontal/vertical area.

Example:

01
SOLVENT FLEX

Star Flex
Black Back
One Way Vision
Canvas
Vinyl
Sunboard
Backlit Printing

When the user hovers over the service:

- background changes
- typography expands
- a relevant visual appears
- service number moves
- subtle distortion/parallax occurs

Use smooth Framer Motion animations.

On mobile, convert this into elegant expandable service rows/cards.

=====
PRINTING MATERIAL VISUALIZER
=====

Create a unique interactive section called:

CHOOSE YOUR MEDIUM

Show material samples such as:

FLEX
VINYL
SUNBOARD
PVC
PAPER
ACRYLIC
WOOD / MS

When hovering/tapping a material:

- show a realistic visual sample
- update description
- animate texture/lighting
- show possible applications

This should make the site feel like an actual creative studio rather than a brochure.

=====
OUR WORK SECTION
=====

Create:

SELECTED WORK

Use a premium editorial masonry/grid layout.

Categories:

ALL
PRINT
SIGNAGE
BRANDING
GRAPHICS
ADVERTISING

Show visually impressive project placeholders/mockups.

Important:

Do NOT falsely claim that placeholder work was produced for specific clients.

If actual photos from the supplied business are available, use those instead.

Create hover effects:

- image zoom
- title reveal
- category
- arrow movement
- smooth transition

Use different image sizes to create an editorial composition.

=====

PROCESS SECTION

=====

Create a section:

FROM IDEA TO IMPACT

Show the process:

01
DISCUSS

02
DESIGN

03
PRODUCE

04
DELIVER

Use animated connecting lines / typography.

Make this section feel like a timeline inside a design studio.

=====

GRAPHICS DESIGN SECTION

=====

Create a visually strong section dedicated to design.

Headline:

"DESIGN THAT GETS NOTICED."

Show:

- Logo Design
- Social Media
- Packaging
- Brochures
- Invitations
- Menus
- Advertising Creatives

Use floating design mockups.

Some elements can rotate slightly / float gently.

Avoid excessive animation.

=====

SIGNAGE SECTION

=====

Make SIGN BOARDS a major visual section.

Headline:

"MAKE YOUR BRAND
IMPOSSIBLE TO MISS."

Show:

- Acrylic

- LED
- Crystal Letters
- Steel & Brass Letters
- Pixel LED
- Backlit Signage
- Standee
- Sunboard Cutouts

Create a large visual composition resembling a real storefront/signage installation.

Add subtle lighting animation.

=====
ABOUT SECTION
=====

Create:

ABOUT NEW NATIONAL

Use concise professional copy.

Example direction:

"New National Advertising brings together printing, signage, graphic design and advertising production under one roof."

Do not invent years of experience, number of customers, certifications, machinery, awards or client brands unless verified.

Include a strong visual statement:

"FROM THE FIRST PIXEL
TO THE FINAL PRINT."

=====
CONTACT / QUOTE SECTION
=====

Create a dramatic final CTA.

Headline:

LET'S MAKE
SOMETHING
VISIBLE.

Supporting text:

Have a printing, signage or design requirement?
Let's turn your idea into something real.

Buttons:

CALL NOW
WHATSAPP
GET A QUOTE

Phone:
9555759677

Also display:

7506269783
8898805753

Email:

newnationaladv2022@gmail.com

=====
WHATSAPP INTEGRATION
=====

The primary WhatsApp button must open WhatsApp with a prefilled professional message.

Example:

"Hello New National Advertising, I would like to enquire about your printing/design services."

Use:

<https://wa.me/919555759677>

Make sure the number is correctly formatted for India.

Do NOT expose technical implementation details in the UI.

```
=====
CALL BUTTON
=====
```

Make:

CALL NOW

open:

tel:+919555759677

Also provide the other contact numbers in the contact section.

```
=====
EMAIL BUTTON
=====
```

Use:

mailto:newnationaladv2022@gmail.com

```
=====
QUOTE FORM
=====
```

Create a beautiful quote/request form.

Fields:

Name
Phone Number
Email
Service
Project Details
Preferred Quantity
Upload File (optional)

Service dropdown:

Solvent Flex
Offset Printing
Screen Printing
Digital Printing
Sign Boards
Graphics Design
Banner Printing
Sunboard / Sunpack
PVC Card
Other

CTA:

REQUEST A QUOTE

Make the form visually premium.

Do not pretend the form sends emails unless an actual backend/email service is configured.

If backend is not configured, clearly structure the frontend so it can be connected later.

=====

FLOATING CONTACT UI

=====

Create a floating contact control.

Desktop:
small vertical contact pill.

Mobile:
bottom floating action bar:

CALL
WHATSAPP
QUOTE

It should not block content.

=====

ANIMATIONS

=====

Use Framer Motion or an equivalent modern animation system.

Animations should include:

- smooth page entrance
- staggered text reveal
- image reveal masks
- scroll-triggered animations
- parallax
- magnetic buttons
- hover transformations
- subtle card tilt
- service transitions
- number counters only if meaningful
- section transitions
- navbar animation
- cursor interaction on desktop

IMPORTANT:

Animations must feel expensive and intentional.

Do NOT use:

- bouncing everything
- random spinning
- excessive blur
- cheesy animations
- animations that hurt readability
- animations that make the site slow

Respect prefers-reduced-motion.

=====

CUSTOM CURSOR

=====

On desktop create a subtle custom cursor.

Default:
small circle.

When hovering buttons:
expand slightly.

When hovering images:
show a small "VIEW" label.

When hovering service sections:
change cursor state.

Disable custom cursor on touch devices.

=====

SCROLL EXPERIENCE

=====

The entire site should feel like one continuous visual story.

Use:

- smooth scrolling
- section reveal
- large typography
- overlapping elements
- subtle horizontal movement
- visual transitions between sections

Do not make every section look like a separate boxed component.

=====

MICRO INTERACTIONS

=====

Buttons should have:

- hover movement
- arrow animation
- subtle background transition

Links:

- animated underline

Images:

- subtle zoom

Cards:

- subtle elevation

Form fields:

- animated focus states

Navigation:

- smooth active state

=====

FOOTER

=====

Create a premium large footer.

NEW NATIONAL
ADVERTISING

PRINT • DESIGN • SIGNAGE • ADVERTISING

Navigation

Services

Contact

WhatsApp

Email

Contact:
9555759677

Email:
newnationaladv2022@gmail.com

Also show:
Mumbai, Maharashtra, India

Do not invent a detailed street address unless verified.

=====

SEO

=====

Optimize for relevant local search terms without keyword stuffing.

Suggested topics:

New National Advertising
printing services in Mumbai
printing services in Govandi
printing shop in Govandi
digital printing Mumbai
flex printing Mumbai
sign board Mumbai
graphic design Mumbai
banner printing Mumbai
visiting card printing Mumbai
offset printing Mumbai
screen printing Mumbai
acrylic signage Mumbai
LED sign board Mumbai
Sunboard printing Mumbai

Create:

- proper title
- meta description
- canonical
- Open Graph metadata
- Twitter metadata
- semantic HTML
- structured headings
- alt text
- LocalBusiness schema where appropriate
- Service schema where appropriate

Do not fabricate business information in structured data.

=====
PERFORMANCE
=====

The website must be highly optimized.

Use:

- lazy loading
- responsive images
- WebP/AVIF where appropriate
- code splitting
- optimized animations
- minimal JavaScript where possible
- avoid unnecessary dependencies
- avoid huge background videos

Target excellent Lighthouse performance.

=====
RESPONSIVE DESIGN
=====

The website MUST look excellent on:

- 320px mobile
- 375px mobile
- 390px mobile
- 430px mobile
- tablets
- laptops
- 1440px desktop
- large screens

Do not simply shrink the desktop design.

Create a genuinely designed mobile experience.

On mobile:

- typography must remain readable

- buttons must be thumb-friendly
- no horizontal overflow
- animations should remain smooth
- floating contact buttons must be usable
- navigation must become a polished full-screen menu

TECH STACK

Use a modern production-quality stack.

Preferred:

React
TypeScript
Vite
Tailwind CSS
Framer Motion

Use clean component architecture.

Suggested structure:

components/
sections/
data/
hooks/
lib/
assets/

Keep service data separate so it can easily be edited later.

IMPORTANT DESIGN RULE

DO NOT make the website look like:

- a generic WordPress site
- a basic Bootstrap template
- a local shop listing
- a boring corporate website
- a collection of cards
- a generic AI-generated landing page

It should feel ART-DIRECTED.

Think like a professional creative director and UI/UX designer.

Every section should have a reason to exist.

Typography, spacing, composition and motion should work together.

REAL BUSINESS INFORMATION ONLY

Use only the following verified/provided business information:

Business:
New National Advertising

Phone:
9555759677

Additional phones:
7506269783
8898805753

Email:
newnationaladv2022@gmail.com

Website shown in supplied profile:

www.newnationaladvertising.com

Services:

Use the services listed above from the supplied photographs.

Do not invent:

- years of experience
- customer counts
- awards
- certifications
- machinery
- client logos
- fake testimonials
- fake projects
- fake statistics

=====

FINAL QUALITY CHECK

=====

Before finishing:

1. Test every navigation link.
2. Test WhatsApp.
3. Test phone links.
4. Test email link.
5. Test mobile menu.
6. Test all hover states.
7. Test mobile responsiveness.
8. Remove horizontal scrolling.
9. Check typography.
10. Check contrast/accessibility.
11. Check reduced-motion behavior.
12. Check console for errors.
13. Optimize large assets.
14. Make sure no placeholder text like "Lorem ipsum" remains.
15. Make sure no fake business claims remain.
16. Make sure the website feels premium on the FIRST SCREEN.

MOST IMPORTANT:

Do not stop after creating a basic functional website.

Spend significant effort on the ART DIRECTION, UI/UX, typography, layout, animations, micro-interactions and visual hierarchy.

The finished website should look like a website that a professional branding/creative agency would proudly put in its portfolio.

MAKE IT EXCEPTIONALLY GOOD.
